Re: Reid #16R  
NWSW, Section 18, T-28-N, R-9-W  
30-045-30847

Gentlemen:

*sf*  
The above referenced well is a Fruitland Coal/Pictured Cliffs commingle. Attached is a copy of the allocation for the commingling of the subject well completed on April 12, 2002. DHC-670az was issued for this well.

Gas:	Fruitland Coal	94%
	Pictured Cliffs	6%

Oil:	Fruitland Coal	94%
	Pictured Cliffs	6%

These percentages are based upon separator tests done during workover operations. The Pictured Cliffs formation was having difficulty cleaning up at the time of this separator test. Separator tests will be re-done on this well in six to twelve months. Please let me know if you have any questions.

Sincerely,

*Peggy Cole*  
Peggy Cole  
Regulatory Supervisor

Bureau of Land Management

## Production Allocation Documentation

### Reid #16R

Production Allocation

Fruitland Coal / Pictured Cliffs New Drill

April 2002

### GAS

	<u>Separator Test (MCFD)</u>	<u>Allocation %</u>
Fruitland Coal	95.0	94%
Pictured Cliffs	<u>6.6</u>	6%
Total	101.6	

### Condensate

No condensate was seen during tests. If well starts producing condensate at some point in the future, it will be allocated the same as gas production.
