Gallegos Canyon Unit

Farmington, New Mexico March 16, 1960

Well No. 60 is located 800 ft. from S line and 1650 ft. from E line of sec. 31

SE/4 of Section 31 T-28-N R-11-W N.M.P.M.
($\frac{1}{4}$ Sec. and Sec. No.) (Twp.) (Range) (Meridian)

West Kutz Pictured Cliffs San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6027 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to plug and abandon Gallegos Canyon Unit Well No. 60 as follows since well has ceased to produce a measurable volume of gas.

1. Spot 10 sack cement plug on bottom (approximately 20-40 feet of fill-up inside casing) and squeeze with minimum pressure.
2. Fill hole with fluid.
3. Remove wellhead and surface equipment.
4. Spot 5 sacks cement for surface plug (0-40') and erect dry hole marker.
5. Plug and abandonment operations by above procedure to permit possible re-entry in the event other zones are discovered to be productive in the area.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
