R & G DRILLING COMPANY, INC.

P. O. BOX 1848

FARMINGTON, NEW MEXICO

July 31, 1957

Mr. Emery Arnold
Oil Conservation Commission
120 East Chaco
Aztec, New Mexico

Dear Mr. Arnold:

R & G is presently planning a dual completion of its R & G #11 Krause Well(SFO78863), SW/4, Sec. 28, T28N, R11W, San Juan County.

This well was completed Oct. 7, 1955, in the Farmington formation. After setting 5 $\frac{1}{2}$ " X 14# casing five feet into the top of the Pictured Cliffs, the Farmington sand was perforated from 1105 to 1118, three shots per foot. We now plan to drill fifteen feet below the casing shoe(1697'), run a production packer to approximately 1600 ft. on 2 3/8" tubing and frac.

The dual completion will be a normal tubing - annulus completion with a packer separating the producing zones. Upon completion and the running of initial potential and packer leakage tests, administrative approval by the Oil Conservation will be requested.

This well is located at an inside location on our lease and does not offset any other operator.

Very truly yours,

R & G DRILLING COMPANY, INC.

William C. Russell

Att: Mr. William C. Russell, President

Re: Application for Tentative Approval
for Dual Completion of R & G #11 Krause
SW $\frac{1}{4}$ Section 28-28N-11W, San Juan Co.

Gentlemen:

Tentative approval is granted for the dual completion of the above well as a gas-gas dual in the Farmington and Pictured Cliffs formations subject to the following requirements:

It is required that you either run dual tubing strings or install a side-door choke on your 2-3/8" tubing above the production packer.

Upon final completion, formal application should be made to Mr. A. L. Porter, Box 871, Santa Fe, for administrative approval.

Yours very truly

Emery C. Arnold
Supervisor, District #3
