DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

USA C. J. Holder Well No. 1. After extensive testing the Dakota formation proved to be non-productive. This well has been plugged back to a total depth of 6150' and completion is now being attempted in the Gallup formation.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
