DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Gallegos Canyon Unit Well No. 83 was spudded on November 22, 1958, and on November 23, 1958, 9-5/8" casing was set at 523' with 500 sacks neat cement. After waiting on cement, casing and water shut off were tested to 800 pounds pressure for thirty minutes, which held with no drop in pressure. Reduced hole to 8-3/4" at 523' and resumed drilling operations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
