DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The above well was converted to a water injection well on February 5, 1964, as follows:

1. Pulled standing valve from Gallup tubing string.
2. Hooked up to injection system and started injecting water down tubing into the Gallup zone February 5, 1964.
3. A Baker Model D packer is set at 5700'. This packer installed when well was completed as dual Cha Cha Gallup Basin Dakota well July 18, 1960.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
