(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

July 30, 1951

Well No. 5 is located 1980 ft. from N line and 990 ft. from E line of sec. 13

1E/4 13 28N 13W MPM
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Wildcat San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft. Not available:
will furnish later

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Pictured Cliffs test. Estimated depth 1500'.

Surface casing approximately 90' 32 1/2 10-3/4" (new)

Production casing 1500' 14 1/2 5-1/2" (new)

If commercial production is indicated, producing section will be shot with nitroglycerin.

It is proposed to drill to T. D. with rotary, and complete with cable tools.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

1. The first group of people who are affected by the disease are those who are in the first group of people who are affected by the disease.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

2. The second step is to gather relevant information and data. This can be done through research, consultation with experts, or by analyzing existing data sets.

3. The third step is to develop a plan or strategy to address the problem. This involves breaking down the problem into smaller, manageable parts and determining the best approach to solve each part.

4. The fourth step is to implement the plan. This involves carrying out the tasks and actions outlined in the plan, while monitoring progress and making adjustments as needed.

5. The fifth step is to evaluate the results. This involves comparing the outcomes of the implementation against the original goals and objectives, and identifying any areas for improvement.

6. The sixth step is to communicate the findings. This involves sharing the results of the analysis with the relevant stakeholders, and providing recommendations for future action.

7. The seventh step is to review the process. This involves reflecting on the entire process, from problem identification to final evaluation, and identifying any lessons learned or areas for improvement.

8. The eighth step is to document the findings. This involves creating a clear and concise report that summarizes the key findings and recommendations, and provides a record of the process.

9. The ninth step is to disseminate the information. This involves sharing the findings and recommendations with a wider audience, through reports, presentations, or other communication channels.

10. The tenth step is to follow up on the recommendations. This involves implementing the recommended actions, and monitoring progress to ensure that the goals and objectives are achieved.

Company Benson & Montin, Dallas, Texas
Lease Gallegos Canyon Unit Well No. 5
Sec. 13 T. 28 N., R. 13 W., N.M.P.M.
Location 1980' from the North line and 990' from
the East line.
San Juan County New Mexico

Scale—4 inches equals 1 mile.

This is to certify that the above plat was prepared from field notes of actual surveys made by me or under my supervision and that the same are true and correct to the best of my knowledge and belief.
