SUBSEQUENT REPORT OF:

RECEIVED

APR 3 1980

U. S. GEOLOGICAL SURVEY  
FARMINGTON, N. M.

(NOTE: Report results of multiple completion or zone change on Form 9-330.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Well was drilled and completed in the Gallup Formation in 1963. Well was plugged in May, 1967 leaving all casing in the well. In September, 1976 it was proposed to re-enter the well and complete in the Pictured Cliffs formation. Well was re-entered in October, 1976 but prior to perforating the Pictured Cliffs operations were suspended. Well has been held in TA Status pending its possible use as a water disposal well. It has now been determined it has no application for a water disposal well. We will be submitting a Sundry Notice in the near future to P & A this well. We request a Temporary Abandonment Status for a few months until we can get around to plugging it.

Subsurface Safety Valve: Manu. and Type

18. I hereby certify that the foregoing is true and correct
