17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well was drilled and completed in the Gallup formation in 1961. A DV cementing tool was set at 1761' and 150 sacks of cement were circulated across the Pictured Cliffs interval. The well was plugged in August, 1966, leaving all the casing in the hole.

It is proposed to re-enter this well and drill out any necessary cement plugs to 1600'+. A drillable bridge plug will be set at 1570'+ and the Pictured Cliffs formation perforated, tested and if commercial, put on production.

18. I hereby certify that the foregoing is true and correct
