Re: Application for approval of an  
unorthodox oil well location in the  
Totah-Gallup Oil Pool and a dual  
completion in the Totah-Gallup Oil  
Pool and Basin-Dakota Gas Pool

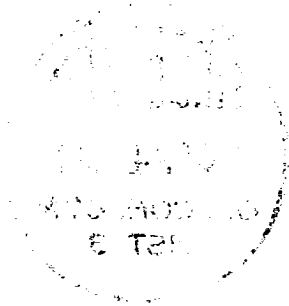

Gentlemen:

We hereby make application on behalf of our client, Aspen Crude  
Purchasing Company, for the following relief, to-wit:

1. An unorthodox oil well location in the Totah-Gallup  
Oil Pool at a point 1190 feet from the South line and  
2210 feet from the East line of Section 11, Township  
28 North, Range 13 West, N.M.P.M., San Juan County,  
New Mexico. The foregoing unorthodox location is  
necessitated by topographical conditions in the  
quarter-quarter section which prevent the drilling of  
a well at an orthodox location thereon. Mr. Al Kendrick  
in the Aztec office of the Oil Conservation Commission  
has made a personal inspection of the subject area and  
can confirm the existence of the topographical features  
referred to above.

The oil and gas leasehold ownership within a radius of  
790 feet from the above referenced location is common  
with the ownership of the oil and gas leasehold estate  
under said well.

RECEIVED  
U.S. DEPARTMENT OF AGRICULTURE  
WASHINGTON, D.C. 20250  
JAN 10 1964

2. An oil over gas dual completion in the Totah-Gallup Oil Pool and Basin-Dakota Gas Pool, all as is more fully shown on the attached dual completion application forms.

It would appear from the rules and regulations of the Oil Conservation Commission of New Mexico, that both types of relief requested above can be granted by Administrative Order and this form of relief is hereby expressly requested. If, however, it is ascertained by the Commission that any portion of the relief requested above cannot be granted by Administrative Order, we hereby request that the same be set down for hearing at the earliest possible date.

Very truly yours,

VERITY, BURR & COOLEY
