(Other) Re-enter P & A Well ☒

(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well was drilled and completed in the Gallup formation in 1966. A DV cementing tool was set at 4283' and 800 sacks of cement were circulated across the Pictured Cliffs interval. The well was plugged in March, 1973, leaving all the casing in the hole.

It is proposed to re-enter this well and drill out any necessary cement plugs to 1800'+. A drillable bridge plug will be set at 1650'+ and the Pictured Cliffs formation perforated, tested and, if commercial, put on production.

Attn: Mr. L. O. Speer, Jr.
Area Supt.

Gentlemen:

Energy Reserves Group, Inc. proposes to re-enter P & A Gallegos Canyon Unit well #251, located 660' FNL, 2260' FWL (SE NE NW) Section 24-T28N-R12W, San Juan County, New Mexico. A copy of the application is attached. This well was originally drilled and completed on oil well spacing. Since we propose to attempt a gas well completion in the Pictured Cliffs formation, this notification is required.

If you have no objections to our proposal would you please sign in the space below and forward to the following address.
