The elevation of the derrick floor above sea level is \_\_\_\_\_ ft. (To be reported later)

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Spudded 12-1/4" hole on 1-28-62. 8-5/8" casing set at 370' with 200 sacks Incon cement containing 2% calcium chloride. Circulated 50 sacks. After waiting on cement to set tested casing with 400 psi for 15 minutes with no drop in pressure. Reduced hole to 7-7/8" at 370' and resumed drilling.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
