RE: ORDER R-7784, CURTIS J. LITTLE, FED. COM WELL NO. 2-E, UNIT N,
11-28N-13W, SAN JUAN COUNTY, N.M.

Dear Mr. Walsh:

As requested by your letters dated April 16 and May 1, 1986, we are extending the hardship gas well classification granted by the captioned order.

The water production, supplied by your letter of May 1, indicates a decreasing volume. In the absence of flowing tubing pressure data, we assume that the well is improving in its flowing characteristics. We believe it is appropriate, therefore, to reduce the minimum flow rate to 80 MCF per day.

Order No. R-7784 is hereby extended in effect until May 31, 1987, except that the minimum flow rate in ordering paragraph (1)(c) is reduced to 80 MCFD.

Sincerely,

R. L. STAMETS
Director
