13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

BP America Production Company requests permission to DHC this dual West, Kutz Picture Cliffs & North Pinon Fruitland Sand well, as per the attached procedure. (No new zones will be added.) The N, Pinon Fruitland Sand (82920) & the W, Kutz Pictured Cliffs (79680) pools are Pre-Approved for Downhole Commingling per NMOCD CASE NO.12520, ORDER NO. R-11567 effective 04/26/2001. Although the interest owners are not identical between these two pools, this same order established approval for subsequent applications for the downhole commingling of production in wellbores within the Gallegos Canyon Unit without notice to the unit interest owners, therefore, no additional notification is required prior to downhole commingling approval. Production is proposed to be allocated based on the subtraction method. Because the PC has not produced since 1993 we are using the projected future decline for production from the N, Pinon Fruitland Sand. That production shall serve as a base for production subtracted from the total production for the commingled well. The balance of the production will be attributed to the W,

14. I hereby certify that the foregoing is true and correct.

Electronic Submission #10009 verified by the BLM Well Information System
For BP AMERICA PRODUCTION COMPANY, sent to the Farmington

Reason for work:

This dual PC/FS well is to be down hole commingled.

Procedure:

1. MIRU SU. Record TP and CP.
2. POOH with rods (1" 10RD tbg) and pump. ND WH, NU BOP.
3. Unset Baker AD-1 tension packer and POOH with 2-3/8" production tbg.
4. TIH with bailer to check PBTD.
5. RIH with following tubing string:
 - a) Cut off jt
 - b) SN
 - c) 2-3/8" tbg to surfaceLand tbg at +/- 1325'.
6. ND BOP. NU tree.
7. RIH with rods and redressed pump.
8. RDMO SU.
