Re: E.H. Pipkin No. 28
Basin Fruitland Coal Field
San Juan County, New Mexico

Dear Sir,

In response to your question on the sundry notice dated August 30, 1991, for the above referenced well (copy attached), cement was circulated to surface on both the 8-3/4" surface casing and the 4-1/2" production casing. During the production casing (4-1/2") cement job, full returns were obtained throughout the job with approximately 10 bbls returned to surface. Therefore, top of cement is located at the surface for this well.

• Please let me know if I can be of further assistance.

Sincerely,

Melissa Torbet
Sr. Production Engineer
