13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

M & G Drilling Company proposes to have a pipeline and metering facility constructed to connect the newly drilled Krause #94 well to the El Paso Field Services low pressure gathering system for gas sales. This pipeline and metering facility will be constructed and operated by El Paso Field Services. The proposed pipeline will parallel (within 15 feet) the existing EPFS high pressure pipeline in this area. The pipeline will be buried and consist of approximately 3050 ft. of 4 1/2" OD 0.156" wall thickness X42 linepipe, wrapped and coated. The entire length of this pipeline project is within M & G leasehold rights (SF-078863). Included with this sundry is a map of the project area and the writup of the archeological study performed for this pipeline by Arboles Contract Archaeology. The on-site inspection for this project was performed on 08/10/95 with Mr. Bill Lease from the Farmington BLM office.

14. I hereby certify that the foregoing is true and correct

Signed

*Kevin H. McGord*
