17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

A second approval is requested to retain this well in its present temporarily abandoned status. It produced commercially through a temporary line until the practice was discontinued in 1962 at the request of the U.S. Forest Service. Since that time the well has been shut in awaiting a time when it may become economically feasible to lay a permanent line. In 1972 the well was checked for a casing failure and no evidence of one existed. Since that time periodic visits to check the bradenhead and surface equipment have not revealed any change in the wells condition.
