13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Since the casing failed the integrity test a packer was placed in the hole temporarily to isolate all of the MV intervals, including the Lewis Shale. Phillips would like to continue to flow test the Mesaverde an additional 6 months to determine if it is feasible to spend anymore money trying to repair the casing. If it is determined to be economical the casing will be repaired. If it is not the well will be plugged and abandoned.
