12. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

Plans are to add the Mesaverde interval to the existing Dakota well and then commingle production from both zones per DHC Order #11363. A sundry detailing the Dakota forecast will be filed before actual commingling occurs. Brief details of the procedure we will use are as follows.

MIRU. COOH w/production tubing. Isolate existing Dakota interval with a bridge plug. Pressure test the casing and remediate with cement if casing fails pressure test. Run GR/CCL/CBL & remediate with cement if the interval completing isn't adequately covered. Perforate and stimulate the Mesaverde intervals. Remove bridge plug and return well to production with the Mesaverde and Dakota commingled. May flow test the different intervals of the Mesaverde separately before commingling occurs.

A workover pit will be used during the workover and will be lined and fenced. Once the workover is complete, the pit will be closed.

DHC 489 AZ
