13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

This is a Mesaverde well that was permitted and completed in early 2001. Plans are now to add the Pictured Cliffs interval. We will then commingle the PC & MV production. This will be commingled per DHC Order #11363 after the commingle paperwork has been filed and the individual well commingle order has been received. We will then submit a sundry reporting the date actual commingling occurs. Brief details of the procedure as follow:

MIRU. Pull tubing. Set RBP above MV perfs & PT casing. Perforate PC intervals to be determined from GR/CCL/CBL. Acidized perfs and then stimulate. Flowback to clean up. Drill out RBP & clean out well, land tubing and return well to production as commingled.
