	<input type="checkbox"/> Water Shut off
	<input type="checkbox"/> Conversion to Injection

13. Describe Proposed or Completed Operations

The subject well is a 2000 Lewis Shale payadd in 7" and 4 1/2" casing. This well was drilled in 1986 and was completed in the Pt. Lookout, Menefee, and Cliffhouse intervals. The Pt. Lookout/Lower Menefee interval was stimulated w/ approximately 101,600 gal. total slickwater and no sand. The Cliffhouse/Upper Menefee interval was stimulated w/ approximately 100,830 gal. total slickwater and no sand and placed on production. The Lewis will be perforated and fracture stimulated in one (1) stage with 101,434 total gal. of 75Q N2 foamed 20# linear gel and 156,000 lbs. total 20/40 mesh sand. The well will then be cleaned-up, tubing landed in the Mesaverde and placed on production.
