If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

In response to your March 4, 1994 letter: This well has recovered more than 500 MMCF, and appears to have substantially depleted the reserves in this location. There appears to be little potential for restoring production. We plan to P&A this well in 1994. We asking for continued shut in status until such time.
