6330'

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

It is intended to repair the casing failure by pulling the tubing and packer, setting a bridge plug above the perforations and isolating the leak. The failure will be squeeze cemented with a sufficient amount of cement to repair the leak. Following clean out of the cement, the casing will be pressure tested to 750 psi, the bridge plug drilled out, and the production tubing rerun.

Subsurface Safety Valve: Manu. and Type _____ Set @ _____ Ft.

18. I hereby certify that the foregoing is true and correct

SIGNED _____ TITLE Project Drilling Engr. DATE March 15, 1983
