Dear Mr. Durrett:

This is to advise that the above well has been worked over and successfully recompleted in the Mesaverde formation. The 5½" production casing was perforated at 1750 feet and 600 sacks of cement were squeezed through the perforations and the cement was circulated to the surface. Therefore all oil, gas and water are now being confined to the formation in which they occur.

Yours truly,

Emery C. Arnold
Supervisor, Dist. #3
