DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

Notice of Intention to Drill, Form 9-331a, filed June 23, 1951, proposes drilling to total depth with rotary rig and to clean out well with reverse rotary rig after shooting with HCl. It is now proposed to drill to the Cliffhouse formation with rotary rig, set casing on top of Cliffhouse formation, then after drilling the plug with water, gas will be used to drill the Mesa Verde formation. Mesa Verde formation will be shot with HCl and cleaned out with rotary rig using gas. There is no proposed change in casing and tubing program.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
