FRACTURE TREATMENT <input type="checkbox"/>	ALTERING CASING <input type="checkbox"/>
SHOOTING OR ACIDIZING <input type="checkbox"/>	ABANDONMENT* <input type="checkbox"/>

(Other) _____

(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Propose to finish workover stated in June, 1970, and abandoned due to adverse mechanical conditions.

Workover is planned in the following manner:

Set drillable cement retainer near bottom of 7" casing and requeueze open hole with approximately 150 sks. cement.
Pressure test 7" casing (Ojo Alamo was squeezed on original workover attempt). If leak off is excessive, 7" casing will be resqueezed.
Gas drill sidetrack hole to approximately 5655'. If water entry prohibits gas drilling, sidetrack hole will be foam drilled.
Run a full string of 4 1/2" production casing. Cement with sufficient amount to tie into 7" casing.
Selectively perforate and sandwater fracture the Mesa Verde formation.

18. I hereby certify that the foregoing is true and correct
