17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

propose to finish workover stated in June, 1970, and abandoned due to adverse mechanical conditions.

Workover is planned in the following manner:

Set drillable cement retainer near bottom of 7" casing and requeueze open hole with approximately 150 sks. cement. Pressure test 7" casing (Ojo Alamo was squeezed on original workover attempt). If leak off is excessive, 7" casing will be resqueezed. Gas drill sidetrack hole to approximately 5655'. If water entry prohibits gas drilling, sidetrack hole will be foam drilled. Run a full string of 4 1/2" production casing. Cement with sufficient amount to tie into 7" casing. Selectively perforate and sandwater fracture the Mesa Verde formation.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
