(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

August 12, 1956

Well No. Howell 1-B is located 1129 ft. from N line and 1652 ft. from E line of sec. 10

NE/4 Sec. 10 (1/4 Sec. and Sec. No.) 30N (Twp.) 7W (Range) NM (Meridian)
Blanco Reservoir (Field) El Arriba (County or Subdivision) New Mexico (State or Territory)

The elevation of the derrick floor above sea level is 6235 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On 9-14-56 a Halliburton retainer was set in 7" casing at 2125' and cemented with 100 sacks Ideal regular cement.

We plan to perforate 7" casing with 3 1/2" holes at approximately 200' and circulate cement. We will remove well head equipment, weld a plate over 7" casing, cement cellar, place 4" marker pipe and permanently abandon well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
