Aztec, New Mexico 87410

Dear Mr. Gholson:

This is to follow up on a letter we received from your office concerning our Rio Chama #2, J-2-30N-03E. The well was drilled to 362 as indicated in our 103 Report. The well's surface casing has not been pressure tested. Also, we have not drilled out from under the casing. We have plans to do the pressure test before we start drilling again this spring.

I apologize for the lateness of this letter.

Sincerely,

Todd R. Heyse
