13. Describe Proposed or Completed Operations

It is intended to add the Pictured Cliffs pay to the subject well by pulling the existing 2 3/8" tubing. A CBL was run on July 15, 1994 indicating bond across the interval. A bridge plug will be set above the liner top and the Pictured Cliffs will be perforated from 3176-3218' and stimulated with 90,000 pounds of sand. The bridge plug will be retrieved and a production packer run and set in the 7" casing to isolate the two zones. The Mesaverde tubing will be rerun in the hole and the Pictured Cliffs tubing run in the hole. This well will be a dual completion. Application for multiple completion and non-standard location is being made to the New Mexico Oil Conservation Division.

14. I hereby certify that the foregoing is true and correct.
