17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

The subject well is currently shut-in as per BLM approval of August 1987. Texaco requests to extend the current shut-in status of the H. J. Loe 'B' #2 for another 12 months. The existing production casing was tested on September 13, 1988. The casing held 1000 PSI for 15 minutes. Texaco requests the additional shut-in approval because it has not current plans for the existing wellbore and the wellbores' good casing integrity poses no environmental hazard.

Your cooperation is appreciated.
