Farmington, New Mexico*

Att: Mr. T. A. Dugan

Dear Mr. Dugan:

Reference is made to your letter of July 1, 1958 requesting tentative approval for the dual completion of the Paul Case #4 Sullivan well located in the SW¹ Section 25-29N-11W.

It is not clear from your letter how the Fruitland formation is to be produced in this well. We are granting tentative approval by this letter subject to the following conditions:

Either dual tubing strings will be run or a side-door choke installed in the tubing string above the packer.

Yours very truly

*Emery C. Arnold
Supervisor, District #3*

Mr. Emery Arnold
New Mexico Oil Conservation Commission
1000 Rio Brazos Road
Aztec, New Mexico

Dear Mr. Arnold:

Paul Case requests tentative approval to complete their Sullivan #4 as a dual in the Fruitland and Pictured Cliffs formations. The Sullivan #4 is located 1450' FSL and 1045' FWL sec 25, T 29 N, R 11W, San Juan County, New Mexico.

Paul Case plans to set 8-5/8" csg at 103', 5 1/2" at 1820'. Perforate and frac Pictured Cliffs and Fruitland with a total of 40,000 gal water and 40,000 20-40 sd. Clean out hole to total depth. Set 1 1/4" tubing with a production packer between the Pictured Cliffs and Fruitland formations.

Very truly yours,

T. A. Dugan
Consulting Engineer
