If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Amoco Production Company conducted a mechanical integrity test on the subject well on 4-25-86. The well pressure tested to 500 psi and held for 15 minutes. The test was witnessed by Carolyn J. Taplin of NMOCD, Aztec.

Since the test held and was approved by NMOCD, we do not intend to repair the subject well according to the procedure dated 4-22-86.
