Att: Mr. Emery C. Arnold
Re: Bunce #1 G-19-29N-10W,
Aztec, P.C.

Dear Sirs:

Your communication dated June 19th has been received and the contents carefully noted.

No doubt by this time Mr. Heyes of GeoElectric, Inc. has conveyed to you our serious intentions and plans for the above property.

Since it is absolutely necessary that we hear from an associate before positive action can be taken, it is respectfully requested that you allow us an extension of only one month's time. We shall have definite word by the 22nd of July and will notify you accordingly as to whether remedial work will be started on the existing well, or whether we shall start another well on this property.

Your kind indulgence in this matter is greatly appreciated.

Thanking you, we remain

Yours very truly,

A. B. Weiss

Re: Harvey-Counsellors #1 Bunde
G-19-29N-10W, Aztec PC Pool

Gentlemen:

Recently indications of casing failure were discovered at the above well. On about February 14, 1963 a bradenhead test was conducted at the well by Commission personnel and definite indications of casing failure were established.

We are, therefore, directing that immediate steps be taken to remedy the casing in this well to prevent the possibility of reservoir damage. Please submit Form C-102 indicating the method you intend to use in repairing the well. We are enclosing a supply of this form.

Yours very truly

Lmery G. Arnold

Re: El Banco, G-19-29W-10W
Anteo Pictured Cliffs Pool

Dear Sir:

Reference is made to our communications in February and March, 1963 regarding remedial work on the above well. On March 11, 1963 you informed this office that it was your intention to appraise the best method of repairing the well in the very near future. At that time you requested an extension of time in order to make a decision.

We are certain that casing damage exists in this well and that there is a great possibility that damage is being done to the producing formation. We therefore do not feel that we can delay any further in insisting that the well either be repaired or plugged & abandoned. Unless Form G-102 is filed in this office prior to July 1, 1963 setting out your plan of remedial action it is our intention to set the matter for hearing before the Oil Conservation Commission in order that you or the bonding company may show cause why the well should not be repaired or properly plugged and abandoned. We also must insist that actual remedial action be commenced prior to July 10, 1963.

If any further information is required, please contact this office.

Yours very truly

Re: Bunce #1. G-19-29N-10W,
Aztec PC

Gentlemen:

Pursuant to your communication of February 26th, we are making arrangements to meet with Mr. Francis Harvey in the Basin within the next several weeks so as to appraise the best method for repairing the above PC well.

We certainly appreciate your indulgence in this matter and you may be sure you will be informed of our decision at the earliest possible date.

Thanking you, we remain

Yours truly,

A. B. Weiss
