DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate muddling jobs, cementing points, and all other important proposed work)

The well was spudded at 3:00 A.M., May 16, 1952. On June 8, 1952, 13-1/2" casing was landed at 1750 feet and cemented with 1300 sacks of cement. Cement circulated to surface. Cement plug down at 12:45 A.M., June 9, 1952. At 5:00 A.M., June 11, 1952, casing and water shut-off were tested at 1000 pounds for 30 minutes, with no drop in pressure. Forty-nine feet of solid cement were drilled in bottom of pipe and water shut-off was again tested at 1000 pounds for 30 minutes. There was no drop in pressure during this test and drilling operations were resumed.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
