DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Total depth 5160'. On May 16, 1961, 4-1/2" casing was set at 5156' and cemented with 125 sacks of 6 percent gel followed by 75 sacks of neat cement. After waiting on cement to set, tested water shut off with 3000 psi for 30 minutes which held with no indication of pressure drop. Resumed completion operations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
