Attn: Mr. A. L. Porter, Secretary-Director

Re: Plugging and Abandonment, George E.  
Willet #7 SDD Hare, 0-14-29N-11W

Dear Mr. Porter:

The above well was drilled to a total depth of 900 feet in the Kirtland Shale formation. The operator perforated the Farmington Sandstone from 708 to 723 feet and attempted to complete as a gas well. The well was never connected to the pipeline nor produced and early in 1963 we notified the operator that the well should be either plugged and abandoned or placed on production. Subsequent to this the operator did move a small workover rig on the well and performed swab tests in an effort to make the well produce. These attempts were unsuccessful and the well is presently shut in and logged off with water. Potential tests on the well were witnessed by personnel from this office.

I would like to request that a case be docketed for an early examiner hearing to have the operator and bonding company show cause why the well should not be plugged and abandoned.

Yours very truly

Emery C. Arnold  
Supervisor, District #3
