(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Wildeat San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 5178 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

USG Section 18, Well No. 18, was plugged and abandoned on January 28, 1958, in the following manner:

1. Spotted 50 sack cement plug from a total depth of 859' to surface.
2. Filled remainder of pipe with cement and reerected marker and restored ground to its original contours.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
