DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Propose to drill to an estimated depth of 6700 feet or to test the Dakota formation. Casing program will be as follows:

10 3/4" 32.75# surface casing set at approximately 200' w/150 sx.

4 1/2" 10.50# casing set at total depth w/300 sx or cement to cover the Gallup formation.

Will place DV tool below Pictured Cliffs with cement to cover the Pictured Cliffs and Fruitland sands.

Will perforate and sand water frac the Dakota formation.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Southwest Production Company
