

Well was deemed to be non-productive of oil and/or gas,  
and was plugged and abandoned at 2 AM 9/11/64, in accordance  
with instructions from the United States Geological Survey  
at Farmington, New Mexico. Plugs placed as follows:

Plug No. 1:	4080 to 4180'	with 25 sx cement
Plug No. 2:	950 to 1050'	with 25 sx cement
Plug No. 3:	0 to 40'	with 10 sx cement

Steel well marker was welded in top of surface casing.
