H. M. Federal "I"

Well No. 1 is located 1850 ft. from N line and 790 ft. from E line of sec. 11N/4 of Sec. 11
(1/4 Sec. and Sec. No.)28N
(Twp.)14E
(Range)101W
(Meridian)Undesignated
(Field)San Juan County
(County or Subdivision)New Mexico
(State or Territory)The elevation of the Ground derrick floor above sea level is 5459 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well with rotary tools to a sufficient depth to test the Morrison zone. We propose to set 325' of 9 5/8" surface casing and cement to surface; to drill through the Morrison to a depth of approximately 5000', and if, upon evaluation of open hole information and electrical surveys, there is indication of commercial production, to set 5 1/2" casing through zone.

We propose to gun perforate the casing and, if necessary, to sand-oil fracture during completion.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be started.
