

NEW MEXICO  
OIL CONSERVATION COMMISSION  
AZTEC, NEW MEXICO

April 3, 1936

Mr. H.L. Fannin, Jr.  
300-B Eighth Street N.W.  
Albuquerque, New Mexico

Dear Mr. Fannin:

Returned herewith are Gas Well Flats for the #6 Cornell well.  
The location thereon is the same as our records show for the  
#6 Cornell.

As I recall this is the same "mix-up" as occurred earlier regarding  
Forms C-104.

Either correct your records or ours concerning the location of these  
two wells.

Yours very truly

A. R. Kendrick  
Engineer, District #3

NEW YORK  
OIL CONSERVATION COMMISSION  
ASTORIA, NEW YORK

April 2, 1934

Mr. J. H. Lusk, Jr.  
200 North Street  
Astoria, New York

Dear Mr. Lusk:

I have been very interested in the work you are doing for the Oil Conservation Commission. The location of the well is very important in the case of an oil well, and the location of the well is very important in the case of an oil well.

As I recall this is the same well as the one which was located in the case of an oil well.

I have been very interested in the work you are doing for the Oil Conservation Commission. The location of the well is very important in the case of an oil well, and the location of the well is very important in the case of an oil well.

Yours very truly

J. H. Lusk, Jr.
