Refer to Notice of Intention to Drill, same location as above, dated 1-16-62. We propose to change our original plans as follows: Set and cement approximately 4500' of 9 5/8" 0.D. intermediate casing instead of 8 5/8" casing as originally reported, and set and cement a 7" 0.D. liner from approximately 4500' to 6500' instead of 5 1/2" liner as originally reported. The changes in size of intermediate casing and liner are the only changes in plans from the original intention.
