EPROC Associates & Martin Oil & Gas Co.
4705 North 3rd Place
Phoenix, Arizona

Gentlemen:

On May 12, 1966 Subsequent Report of Plugging and Abandonment was received for your #1 Martin-Stampfel well located in the SE $\frac{1}{4}$ Section 3-29N-16W. We sent you a form notice at that time notifying you that this form could not be approved until such time as you had advised us that the location was cleaned of all junk and that all pits had been filled and levelled.

From a field inspection this date we have determined that two large oil tanks are still on the location and a pit partially filled with oil and sludge is still remaining unlevelled. Will you please advise when the remaining work will be done on this location so that we may approve your plugging report and cancel your plugging bond?

Yours very truly

Henry C. Arnold
Supervisor, District #3
