Gentlemen:

Notice of Intention to Drill was filed on the above well on August 3, 1961. Subsequent notices were filed indicating that production casing was cemented at 3915' with 125 sacks. However an allowable has never been requested, nor has Form C-105, Well Record, been filed. We therefore presume that the well is a dry hole.

We are therefore demanding that the well be plugged and abandoned according to the New Mexico Oil Conservation Commission Rules and Regulations. Form C-105, Well Record form, and Form C-102, Notice of Intention to Plug, should be submitted for approval before beginning plugging operations. In the event some action is not taken within 30 days it is our intention to set the matter for hearing before the Oil Conservation Commission in Santa Fe in order that the operator and the bonding company may show cause why the well should not be plugged and abandoned.

Yours very truly

Emery C. Arnold
Supervisor, District #3
