Re: El Paso Natural Gas, Cornell-5
G-1-29-12

Dear Mr. Arnold:

The above captioned well has been shut-in as per order number SF-298, due to being overproduced. This well is scheduled for 1958 annual deliverability test which begins conditioning period March 24th.

The 1957 annual deliverability test which we submitted for this well showed the shut-in pressure to be less than the flowing pressure.

We would like to have your permission to produce this well in such a manner as to test it in Area No. 6 as scheduled, and this test also be a test for new allowables.

Very truly yours,

H. L. Kendrick
Gas Engineer
