Astec, New Mexico April 9, 1965

Petro Federal
Well No. 6-2 NW is located 990 ft. from N line and 1050 ft. from E line of sec. _____

Section 6 29 North 11 West N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

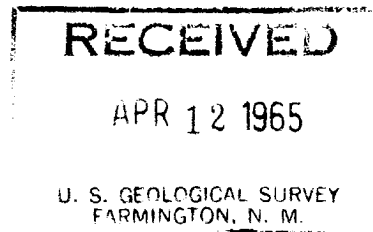

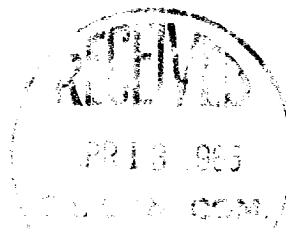

Basin Dakota Santa Fe New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 5813 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well is a dual Dakota-Messaverde well with the Messaverde producing from the tubing-casing annulus. The Messaverde produces large volumes of water and will not flow gas into the pipeline. It is proposed that this well be classified as temporarily abandoned by shutting it in at the surface until such time as work is necessary on the Dakota.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
