(State or Territory)

The elevation of the derrick floor above sea level is 5819 ft. D. F.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Pumped 47 barrels 13# drilling mud down braden head. Well still had pressure on braden head. Well kicking through crater. Pumped 135 sacks 18# cement down braden head. Displaced surface casing with water. Well still kicking through crater. Pumped 200 sacks of 25% calseal cement down braden head, displacing braden head with water. Crater dead. Braden head shut-in w/pressure.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
