Re: Tenneco Oil Company  
Linda Nye #1  
B-20-30N-8W

Dear J. D.,

We have recently received complaints of the subject well being blown to the atmosphere without the vented gas being flared.

In the interest of conservation, minimal gas should be vented.

In the interest of safety, all vented gas should be flared.

Please study your producing procedure to determine a manner to produce the well with a minimum of venting or flaring.

If there are questions, please contact us.

Yours very truly,

A. R. Kendrick  
Supervisor, District #3
