

NEW MEXICO OIL CONSERVATION COMMISSION  
PACKER SETTING REPORT

I, Fred Sloup, being of lawful age and having full  
Name of party making report  
knowledge of the facts hereinbelow set out do state:

That I am employed by Welex Div. Of Halliburton Co. in the capacity of  
Field Engineer, that on July 11, 1965

I personally supervised the setting of a Baker Mod. "D" Production Packer  
Make & type of packer  
in Tenneco Oil Company, Florence  
Operator of well Lease name L-14-30-8

Well no. #38 located in the Basin Dakota field,  
Jan Juan county, state of New Mexico, at a subsurface depth of  
7420' feet, said depth measurement having been furnished me by  
Leon Abrusley, Drilling Engineer;

That the purpose of setting this packer was to effect a seal in the annular space between two strings of pipe where the packer was set so as to prevent the commingling, in the bore of this well, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer; that this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as to prevent any movement of fluids across the packer.
